SUMMARY

Motivated Computer Science student with a strong foundation in frontend web development and database management, eager to expand into full-stack development. Known for creative problem-solving, technical expertise, and a passion for delivering impactful digital solutions, with additional interests in graphic design and UI/UX optimization.

EDUCATION

NFC-IET University

Bachelor of Science in Computer Science

Multan NOV 2021 – Dec 2025

EXPERIENCE

React JS Developer Intern

. Devlogix July 2024 – Oct 2024 Remote

- · Contributed to requirement gathering, documentation, and module creation for an HR system.
- Designed and developed Employee and Login modules using React.js and Tailwind CSS.
- Translated Figma designs into functional prototypes and collaborated with cross-functional teams.
- Created responsive email templates compatible across various email clients.

SKILLS

Frontend Development: HTML, CSS, HTML5, Tailwind CSS, React.js, JavaScript, Bootstrap

Backend and Database: MySQL, XAMPP, WAMP servers

Responsive Design: Expertise in creating responsive, mobile-first web designs with a strong focus on user experience.

Version Control: Git, GitHub for collaborative development and version management.

Design and Prototyping Tools: Figma, Canva, Adobe Illustrator, MS PowerPoint, MS Word

PROJECTS

E-commerce Website UI August 2024

- Designed and developed a fully responsive e-commerce website using HTML, CSS, Bootstrap, and JavaScript, ensuring cross-browser compatibility.
- · Focused on delivering a visually appealing, user-friendly interface to enhance navigation and customer engagement.

Student Management System

October 2023

- Built a comprehensive Student Management System with a frontend in HTML, CSS, and JavaScript, and a backend in PHP and MySQL.
- Integrated features for data entry, retrieval, and management of student records.

Bank Management System

August 2023

- · Designed and implemented a Bank Management System using MySQL on XAMPP for managing customer accounts and transactions.
- · Ensured optimal performance and scalability for secure data management.
